NOTICE

A service exists whereby users of this report may receive any information contained therein which they may select two to three weeks prior to publication on payment of the cost of making and transmitting a special copy of the information desired. The cost for this service generally runs a few dollars a month, the cost being higher if a large number of figures are requested. These "advance" reports are described in the August 1954 *Foreign Trade Statistics Notes* and new "advance" reports are listed (together with their cost) in the monthly issues of the *Notes* when they are first started. The August 1954 *Notes* also describes "preliminary" reports which may be obtained at higher cost a week or two even earlier than "advance" reports.

SUBSCRIPTION INFORMATION

Price: Annual subscription (including annual and monthly issues)..... $3.00
Monthly issues, each..... 0.30

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedure.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (not shown in this report, but published in FT 120 and FT 950).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity group totals (shown at the end of each commodity group in this report).
6. The commodity subgroup totals (included in this report for the first time effective January 1954 in order that users may have ready access, as more fully explained below, to available information on the undercounting in the individual Schedule A classifications in each subgroup resulting from the changed compiling procedure).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by Customs District, etc.

E. The Extent of Undercounting in the Schedule A Commodity Totals and Commodity by Country Statistics in this Report Resulting from Omission of Imports $250 or Less.

Since the monthly total for shipments individually valued $250 or less is in the neighborhood of $8 million ($4 million on informal and $4 million on formal entries) and represents only about 1 percent of the value of all imports, the undercounting for all detailed figures taken as a whole is not great, but it is possible that a high degree of undercounting in individual detailed figures may result. Since the smallest commodity breakdown of the estimated information on shipments valued $250 or less is on a subgroup basis, the amount estimated for each subgroup is the best available indication of the magnitude of the undercounting in the sum of the individual Schedule A classifications in that subgroup. In order that users of the data in Report No. FT 110 may have ready access to this distribution of the $8 million on a subgroup basis, and in order to call attention to the fact that the detailed statistics represent information on shipments over $250 only, subgroup total information has been inserted in the report immediately preceding the data for the first Schedule A commodity number in each subgroup as illustrated:

COMMODITY DESCRIPTION AND UNIT OF QUANTITY SCHEDULE A NUMBER		
COUNTRY OF ORIGIN	NET QUANTITY	VALUE (DOLLARS)
MEAT PRODUCTS		
TOTAL		12,836,891
SAMPLE 41**		67,020
OVER 250		12,769,871
OVER 250 DATA SHOWN BELOW		
BEEF BONE IN FRESH CHLD FROZN		LB
0018300	694,308	198,924
CANADA	241,977	69,781
DOM REP	359,773	104,327
AUSTRAL	87,655	22,247
OTH CTY	4,903	2,569

The value of $12,836,891 shown for TOTAL, immediately below the commodity subgroup description MEAT PRODUCTS is the subgroup total, made up of the fully compiled shipments valued over $250 ($12,769,871) for the subgroup, plus the estimated value for shipments valued at $250 or less ($67,020).

The value of $67,020 shown for SAMPLE is the amount which is estimated, on the basis of the sample, to have been imported in shipments valued at $250 or less for the subgroup. The figure 41 identified by a double asterisk (**) immediately after the word SAMPLE indicates that there were 41 shipments for the subgroup in

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value

the sample. The use of number of shipments in sample to obtain a measure of the reliability of the estimate of the shipments $250 or less, and of the subgroup total which includes it, is explained in paragraph F below.

The value of $12,769,871 shown on the same line with OVER 250 is the total for the subgroup of the fully compiled data for shipments valued at over $250. This total is made up of the detailed statistics in the report shown on a Schedule A commodity by country of origin basis under the heading OVER 250 DATA SHOWN BELOW.

With allowances for sampling variability in the estimates, a measure of which can be obtained as explained in paragraph F below, the undercounting in a particular commodity or commodity by country figure, or any combination thereof within a commodity subgroup, would not be exptected to be greater than the total amount of the low-value estimate for the subgroup shown on the line labeled SAMPLE. In many instances this measure will tend to greatly overstate the limits of the undercounting. The user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total of low-value shipments for the subgroup among the detailed items which appear or which might have appeared for the subgroup in the report. In those cases where no data labeled SAMPLE appear for the subgroup, it can be known that no low-value items for the subgroup appeared in the sample, but this does not necessarily mean that no low-value shipments were made for the subgroup. Similarly, the absence of a Schedule A commodity from the report, or the absence of a country name for a commodity, indicates that there were no imports over $250, but does not necessarily mean that no imports $250 or less were made.

Some indication of the undercounting on a 4-digit Schedule A commodity basis without regard to country is provided in the February 1954 *Notes*, in the form of data for a sample month. Users interested in additional information for particular commodities may make inquiry of the Bureau as to the information available.

When considering the undercounting in January 1954 or subsequent months' detailed figures for purposes of evaluating its effect on comparisons with corresponding figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanation of any sampling procedures used are also included in the issues of Report No. FT 110 for the individual months of 1953. In summary, informal entries were excluded from all import statistics for 1953, and imports on formal entries under $100 were excluded from the detailed figures for the months January - December 1953.

F. The Accuracy of the Sample Estimates of Imports Individually Valued $250 or Less.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated commodity subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in this report, the number in the sample on which the estimate was based is given.

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation whould have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimated increased by
0	0	[2]$2,200
1	$1,600	4,400
2	2,500	5,100
3	3,200	5,600
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,800	9,800
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499[3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup total is the fully compiled figure for imports $250 or more, shown separately for each subgroup in this report, plus 1/20 of the estimated amount shown for $1 to $250 imports.

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combinad, will generally be less than 1 percent.

The illustration given in section E above shows an estimated value of $67,020 based on 41 shipments in the sample. Referring to the line "40-49" in the above table, one notes the values $12,400 and $14,200. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $54,620 ($67,020 reduced by $12,400) and $81,220 ($67,020 increased by $14,200). Similarly, the subgroup total of $12,836,891 in the illustration in section E, which represent a combination of the total of $12,769,871 for the fully compiled data for shipments valued at over $250 plus the estimated value of $67,020 based on 41 shipments in the sample would be between $12,824,491 ($12,836,891 reduced by $12,400) and $12,851,091 ($12,836,891 increased by $14,200).

In the event a user desires to combine two or more commodity subgroup figures which are estimated values or include estimated values the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

G. The Effect of the Changes in Procedure on the Commodity Subgroup, Commodity Group and Over-all Totals.

The over-all import total has been incressed by approximately $4 million per month by the inclusion of informal entries. Some indication of the distribution of this increase by commodity subgroup and commodity group is presented in the February 1954 issue of the *Notes*. Users interested in this information for particular commodities may make inquiry of the Bureau ss to the information avsilable.

These totals are all further affected by the fact that they now include estimates, snd sre therefore subject to sampling vsriability. A statistical measure of the sampling variability csn be obtained in all cases by the method described in paragraph F above. However, the vsriability in the over-all total and in the commodity group totals is expected to be insignificant. The effect of sampling on the reliability of the commodity subgroup totals is less than 5 percent for all but a few of the commodity subgroup figures. The few exceptions are commodity subgroup figures with relatively small (under $200,000) totals.

A further effect of the changes in procedure on the summary figures is that inclusion of the entire estimsted amounts for formal entry import items valued at $250 or less in the commodity subgroup and the commodity group totals in which they belong, effective January 1954, may affect, to a relatively minor extent, the comparability of these totals with the corresponding totals for the period July through December 1953. During the period July through December 1953 estimates of formal entry items valued at less than $100 were included in the total for commodity group 9 "Miscellaneous" and were excluded from the subgroup sndgroup totals aswell as from the commodity and commodity by country data.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular subgroups and commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $250.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

TABLE OF CONTENTS

Description	Schedule A Commodity Code No.	Page No.
GROUP 00 - ANIMALS AND ANIMAL PRODUCTS, EDIBLE		
Animals, edible (except for breeding)	0010600-0015500	8
Meat products	0018300-0035500	8
Animal oils and fats, edible	0036000-0036900	8

Iron ore and concentrates	6001000-6001100	31
Iron and steel semimanufactures	6002000-6060300	31
Steel mill products—manufactures	6081020-6116100	31
Iron and steel advanced manufactures	6117000-6200990	32
Ferro-alloys, ores, and metals, n.e.s	6211000-6270900	33
Nonferrous metals, except precious	6301000-6790990	34
Precious metals, jewelry, and plated ware	6820000-6900550	36
GROUP 7 - MACHINERY AND VEHICLES		
Electrical machinery and apparatus	7063200-7100990	36
Engines, turbines, and parts, n.e.s.	7110000-7110700	37
Other machinery, except agricultural	7400200-7800990	37
Agricultural machinery and implements	7850000-7890190	38
Vehicles, except agricultural	7900100-7940290	38
GROUP 8 - CHEMICALS AND RELATED PRODUCTS		
Coal-tar products	8001000-8090900	38
Medicinal and pharmaceutical preparations	8102000-8150600	39
Industrial chemicals	8170040-8380982	39
Pigments, paints, and varnishes	8400100-8441300	40
Fertilizers and fertilizer materials	8500000-8559900	40
Explosives, fireworks, and ammunition	8620000-8695000	40
Soap and toilet preparations	8712300-8731200	40
GROUP 9 - MISCELLANEOUS		
Photographic goods	9001000-9036600	41
Scientific and professional instruments, apparatus, and supplies, n.e.s	9140200-9180290	41
Musical instruments, parts, and accessories	9200000-9280700	41
Dolls and toys, athletic and sporting goods	9400000-9439990	41
Firearms	9470000-9477000	42
Books, maps, pictures, and other printed matter, n.e.s	9500000-9530890	42
Clocks, watches, clockwork mechanisms, and parts	9540100-9590099	42
Art works and antiques	9610000-9670300	43
Miscellaneous articles, n.e.s	9700000-9990750	43
REVISIONS	.....	NT

UNITS OF QUANTITY

[The following is a list of the abbreviations for units of quantity used in this report. When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively.)]

Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity
AOZ	Advoirdupois Ounce	DPC	Dozen Pieces	LF	Leaf	PK	Pack
BBL	Barrel	DPR	Dozen Pair	LFT	Linear Foot	PR	Pair
BFT	Board Foot	FT	Foot	LTN	Long Ton	RM	Ream
BU	Bushel	GAL	Gallon	M	Thousand	RSQ	Roof Square
BUN	Bunch	GBX	Gross Boxes	MBF	Thousand Board Feet	SFT	Square Foot
CAR	Carat	GLB	Pound (gross weight)	MCF	Thousand Cubic Feet	SQI	Square Inch
CD	Cord	GR	Gross	MFT	Thousand Feet	STN	Short Ton
CFT	Cubic Foot	GRL	Gross Lines	MG	Milligram	SUF	Superficial Foot
CLB	Pound (net content)	GTN	Ton (gross weight)	NO	Number	SYD	Square Yard
CRT	Crate	IN	Inch	PC	Piece	TOZ	Troy Ounce
CTN	Ton (net content)	LB	Pound	PFG	Proof Gallon	WSQ	Wall Square
DOZ	Dozen					YD	Yard

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4. for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

JANUARY 1955

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

JANUARY 1955

** Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

[1]Country of Shipment - (Country of Origin Unknown) *Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

1/Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

2/See Footnote on page 44.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-25D for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. 0th Cty - Includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. 0th Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Classification combined since errors may exist in the distinction between imports reported for them. (See "Imports of Blown Glassware," January 1953 issue of FTSN.)

*Imports from each country are less than $10,000. Oth Cty-includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

[1]Country of Shipment - (Country of Origin Unknown) *Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

JANUARY 1955

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

* See Footnote on page 44.

6458200	2899	1309 *

**import date on line labeled "SAMPLE" are estimates of informel entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statiatica, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double esterisk) to determine reliability of estimates.

*Importe from each country are lese than $10,000. Oth Cty - includes countries from which imports are lese than $10,000.

°See Footnote on page 44.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

"*" Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double esterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

6See footnote on page 44.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

2/ Schedule A Commodity Number 4206 900, "Other wood dowels," is a new classification which became effective retroactive to August 17, 1954. Wood dowels were formerly reported under Schedule A Commodity Number 4080 500, "Unmanufactured wood, n.e.p.f."

4/ Imports of "Round iron and steel wire smaller than 1/5 inch in diameter, coated with metal," formerly reported under Schedule A Commodity Numbers 6094 500, 6094 600, 6094 700, or 6094 800 according to size and/or value, are reported under Schedule A Commodity Numbers 6094 020, 6094 120, 6094 220, or 6094 320 according to size and/or value. These classifications became effective January 1955 and represent the use of "2" as the sixth digit of the regular commodity number (Schedule A Commodity Numbers 6094 000, 6094 100, 6094 200, and 6094 300) to identify the round iron and steel wire coated with metal.

5/ Effective January 1955 the quantity reported for "Columbium ore (columbite), or concentrates," (Schedule A Commodity Number 6270 300) and "Tantalum ore (tantalite)" (Schedule A Commodity Number 6270 400) will be limited to net weight in pounds. Columbium and tantalum pentoxide contents for each classification will no longer be shown in the publicly available import tabulations and reports.

6/ Schedule A Commodity Number 9180 100, "Laboratory scales, balances, and analytical weights, and parts thereof" has been re-established effective January 1955. This classification was deleted effective with the January 1954 statistics and during 1954 data on imports of laboratory scales, balances, and analytical weights, and parts thereof, were reported under Schedule A Commodity Number 9180 290, "Other scientific, professional and laboratory instruments and parts, n.e.s."

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

See April 1955 issue of Foreign Trade Statistics Notes. Classification established for informal entry importations not classifiable in terms of Commodity Subgroup.

REPORT NO. FT 110

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics haa been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistmcs prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported cn *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedure.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (not shown in this report, but published in FT 120 and FT 950).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity group totals (shown at the end of each commodity group in this report).
6. The commodity subgroup totals (included in this report for the first time effective January 1954 in order that users may have ready access, as more fully explained below, to available information on the undercounting in the individual Schedule A classifications in each subgroup resulting from the changed compiling procedure).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classificationa, and from all statistics forcross-clasaifications such as commodity by country, country by Cuatoms District, etc.

E. The Extent of Undercounting in the Schedule A Commodity Totals and Commodity by Country Statistics in this Report Resulting from Omission of Imports $250 or Less.

Since the monthly total for shipments individually valued $250 or lesa is in the neighborhood of $8 million ($4 million on informal and $4 million on formal entries) and represents only about 1 percent of the value of all imports, the undercounting for all detailed figurea taken as a whole is not great, but it is possible that a high degree of undercounting in individual detailed figures may result. Since the smallest commodity breakdown of the estimated information on shipments valued $250 or less is on a subgroup basis, the amount estimated for each subgroup is the best available indication of the magnitude of the undercounting in the sum of the individual Schedule A classifications in that subgroup. In order that users of the data in Report No. FT 110 may have ready access to this distribution of the $8 million on a subgroup basis, and in order to call attention to the fact that the detailed statistics represent information on shipments over $250 only, subgroup total information has been inserted in the report immediately preceding the data for the first Schedule A commodity number in each subgroup as illustrated:

COMMODITY DESCRIPTION AND UNIT OF QUANTITY
SCHEDULE A NUMBER

COUNTRY OF ORIGIN	NET QUANTITY	VALUE (DOLLARS)
MEAT PRODUCTS		
TOTAL		12,838,891
SAMPLE 41**		87,020
OVER 250		12,789,871
OVER 250 DATA SHOWN BELOW		
BEEF BONE IN FRESN CHLD FROZN		LB
0018300	694,308	198,924
CANADA	241,977	69,781
DOM REP	359,773	104,327
AUSTRAL	87,655	22.247
OTH CTY	4,903	2,569

The value of $12,836,891 shown for TOTAL, immediately below the commodity subgroup description MEAT PRODUCTS is the subgroup total, made up of the fully compiled shipmenta valued over $250 ($12,769,871) for the subgroup, plus the estimated value for shipments valued at $250 or less ($67,020).

The value of $67,020 shown for SAMPLE ia the amount which is estimated, on the basis of the sample, to have been imported in shipments valued at $250 or less for the subgroup. The figure 41 identified by a double asterisk (**) immediately after the word SAMPLE indicates that there were 41 shipments for the subgroup in

[1]The terminology used in this statement, and in later references to "Imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

the sample. The use of number of shipments in sample to obtain a measure of the reliability of the estimate of the shipments $250 or less, and of the subgroup total which includes it, is explained in paragraph F below.

The value of $12,769,871 shown on the same line with OVER 250 is the total for the subgroup of the fully compiled data for shipments valued at over $250. This total is made up of the detailed statistics in the report shown on a Schedule A commodity by country of origin basis under the heading OVER 250 DATA SHOWN BELOW.

With allowances for sampling variability in the estimates, a measure of which can be obtained as explained in paragraph F below, the undercounting in a particular commodity or commodity by country figure, or any combination thereof within a commodity subgroup, would not be exptected to be greater than the total amount of the low-value estimate for the subgroup shown on the line labeled SAMPLE. In many instances this measure will tend to greatly overstate the limits of the undercounting. The user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total of low-value shipments for the subgroup among the detailed items which appear or which might have appeared for the subgroup in the report. In those cases where no data labeled SAMPLE appear for the subgroup, it can be known that no low-value items for the subgroup appeared in the sample, but this does not necessarily mean that no low-value shipments were made for the subgroup. Similarly, the absence of a Schedule A commodity from the report, or the absence of a country name for a commodity, indicates that there were no imports over $250, but does not necessarily mean that no imports $250 or less were made.

Some indication of the undercounting on a 4-digit Schedule A commodity basis without regard to country is provided in the February 1954 *Notes*, in the form of data for a sample month. Users interested in additional information for particular commodities may make inquiry of the Bureau as to the information available.

When considering the undercounting in January 1954 or subsequent months' detailed figures for purposes of evaluating its effect on comparisons with corresponding figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanation of any sampling procedures used are also included in the issues of Report No. FT 110 for the individual months of 1953. In summary, informal entries were excluded from all import statistics for 1953, and imports on formal entries under $100 were excluded from the detailed figures for the months January - December 1953.

F. The Accuracy of the Sample Estimates of Imports Individually Valued $250 or Less.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated commodity subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in this report, the number in the sample on which the estimate was based is given.

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimated increased by
0	0	[2]$2,200
1	$1,600	4,400
2	2,500	5,100
3	3,200	5,600
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,800	9,800
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499[3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup total is the fully compiled figure for imports $250 or more, shown separately for each subgroup in this report, plus 1/20 of the estimated amount shown for $1 to $250 imports.

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

The illustration given in section E above shows an estimated value of $67,020 based on 41 shipments in the sample. Referring to the line "40-49" in the above table, one notes the values $12,400 and $14,200. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $54,620 ($67,020 reduced by $12,400) and $81,220 ($67,020 increased by $14,200). Similarly, the subgroup total of $12,836,891 in the illustration in section E, which represent a combination of the total of $12,769,871 for the fully compiled data for shipments valued at over $250 plus the estimated value of $67,020 based on 41 shipments in the sample would be between $12,824,491 ($12,836,891 reduced by $12,400) and $12,851,091 ($12,836,891 increased by $14,200).

In the event a user desires to combine two or more commodity subgroup figures which are estimated values or include estimated values the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

G. The Effect of the Changes in Procedure on the Commodity Subgroup, Commodity Group and Over-all Totals.

The over-all import total has been increased by approximately $4 million per month by the inclusion of informal entries. Some indication of the distribution of this increase by commodity subgroup and commodity group is presented in the February 1954 issue of the *Notes*. Users interested in this information for particular commodities may make inquiry of the Bureau as to the information available.

These totals are all further affected by the fact that they now include estimates, and are therefore subject to sampling variability. A statistical measure of the sampling variability can be obtained in all cases by the method described in paragraph F above. However, the variability in the over-all total and in the commodity group totals is expected to be insignificant. The effect of sampling on the reliability of the commodity subgroup totals is less than 5 percent for all but a few of the commodity subgroup figures. The few exceptions are commodity subgroup figures with relatively small (under $200,000) totals.

A further effect of the changes in procedure on the summary figures is that inclusion of the entire estimated amounts for formal entry import items valued at $250 or less in the commodity subgroup and the commodity group totals in which they belong, effective January 1954, may affect, to a relatively minor extent, the comparability of these totals with the corresponding totals for the period July through December 1953. During the period July through December 1953 estimates of formal entry items valued at less than $100 were included in the total for commodity group 9 "Miscellaneous" and were excluded from the subgroup and group totals as well as from the commodity and commodity by country data.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report. is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular subgroups and commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $250.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

TABLE OF CONTENTS

Description	Schedule A Commodity Code No.	Page No.
GROUP 00 - ANIMALS AND ANIMAL PRODUCTS, EDIBLE		
Animals, edible (except for breeding)	0010600-0015500	8

UNITS OF QUANTITY

[The following is a list of the abbreviations for units of quantity used in this report. When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively.)]

Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity
AOZ	Advoirdupois Ounce	DPC	Dozen Pieces	LF	Leaf	PK	Pack
BBL	Barrel	DPR	Dozen Pair	LFT	Linear Foot	PR	Pair
BFT	Board Foot	FT	Foot	LTN	Long Ton	RM	Ream
BU	Bushel	GAL	Gallon	M	Thousand	RSQ	Roof Square
BUN	Bunch	GBX	Gross Boxes	MBF	Thousand Board Feet	SFT	Square Foot
CAR	Carat	GLB	Pound (gross weight)	MCF	Thousand Cubic Feet	SQI	Square Inch
CD	Cord	GR	Gross	MFT	Thousand Feet	STN	Short Ton
CFT	Cubic Foot	GRL	Gross Lines	MG	Milligram	SUF	Superficial Foot
CLB	Pound (net content)	GTN	Ton (gross weight)	NO	Number	SYD	Square Yard
CRT	Crate	IN	Inch	PC	Piece	TOZ	Troy Ounce
CTN	Ton (net content)	LB	Pound	PFG	Proof Gallon	WSQ	Wall Square
DOZ	Dozen					YD	Yard

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import date on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double esterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

FEBRUARY 1955

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
[a]See Footnote on page 44. *Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

[1] Country of Shipment - (Country of Origin Unknown) *Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

[4]See Footnote on page 44. *Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

°See Footnote on page 44. *Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

COMMODITY DESCRIPTION AND UNIT OF QUANTITY SCHEDULE A NUMBER	COUNTRY OF ORIGIN	NET QUANTITY	VALUE (DOLLARS)

2 Schedule A Commodity Number 4206 900, "Other wood dowels," is a new classification which became effective retroactive to August 17, 1954. Wood dowels were formerly reported under Schedule A Commodity Number 4080 500, "Unmanufactured wood, n.s.p.f."

4 Imports of "Round iron and steel wire smaller than 1/5 inch in diameter, coated with metal," formerly reported under Schedule A Commodity Numbers 6094 500, 6094.600, 6094 700, or 6094 800 according to size and/or value, are reported under Schedule A Commodity Numbers 6094 020, 6094 120, 6094 220, or 6094 320 according to size and/or value. These classifications became effective January 1955 and represent the use of "2" as the sixth digit of the regular commodity number (Schedule A Commodity Numbers 6094 000, 6094 100, 6094 200, and 6094 300) to identify the round iron and steel wire coated with metal.

5 Effective January 1955 the quantity reported for "Columbium ore (columbite), or concentrates," (Schedule A Commodity Number 6270 300) and "Tantalum ore (tantalite)" (Schedule A Commodity Number 6270 400) will be limited to net weight in pounds. Columbium and tantalum pentoxide contents for each classification will no longer be shown in the publicly available import tabulations and reports.

6 Schedule A Commodity Number 9180 100, "Laboratory scales, balances, and analytical weights, and parts thereof" has been re-established effective January 1955. This classification was deleted effective with the January 1954 statistics and during 1954 data on imports of laboratory scales, balances, and analytical weights, and parts thereof, were reported under Schedule A Commodity Number 9180 290, "Other scientific, professional and laboratory instruments and parts, n.s.s."

*Imports from each country are less than $10,000. 0th Cty - Includes countries from which imports are less than $10,000.

REPORT NO. FT 110

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedure.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (not shown in this report, but published in FT 120 and FT 950).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity group totals (shown at the end of each commodity group in this report).
6. The commodity subgroup totals (included in this report for the first time effective January 1954 in order that users may have ready access, as more fully explained below, to available information on the undercounting in the individual Schedule A classifications in each subgroup resulting from the changed compiling procedure).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by Customs District, etc.

E. The Extent of Undercounting in the Schedule A Commodity Totals and Commodity by Country Statistics in this Report Resulting from Omission of Imports $250 or Less.

Since the monthly total for shipments individually valued $250 or less is in the neighborhood of $8 million ($4 million on informal and $4 million on formal entries) and represents only about 1 percent of the value of all imports, the undercounting for all detailed figures taken as a whole is not great, but it is possible that a high degree of undercounting in individual detailed figures may result. Since the smallest commodity breakdown of the estimated information on shipments valued $250 or less is on a subgroup basis, the amount estimated for each subgroup is the best available indication of the magnitude of the undercounting in the sum of the individual Schedule A classifications in that subgroup. In order that users of the data in Report No. FT 110 may have ready access to this distribution of the $8 million on a subgroup basis, and in order to call attention to the fact that the detailed statistics represent information on shipments over $250 only, subgroup total information has been inserted in the report immediately preceding the data for the first Schedule A commodity number in each subgroup as illustrated:

COMMODITY DESCRIPTION AND UNIT OF QUANTITY SCHEDULE A NUMBER		
COUNTRY OF ORIGIN	NET QUANTITY	VALUE (DOLLARS)
MEAT PRODUCTS		
TOTAL		12,836,891
SAMPLE 41**		67,020
OVER 250		12,769,871
OVER 250 DATA SHOWN BELOW		
BEEF BONE IN FRESH CHLD FROZN		LB
0016300	694,308	198,924
CANADA	241,977	69,781
DOM REP	359,773	104,327
AUSTRAL	87,655	22,247
OTH CTY	4,903	2,569

The value of $12,836,891 shown for TOTAL, immediately below the commodity subgroup description MEAT PRODUCTS is the subgroup total, made up of the fully compiled shipments valued over $250 ($12,769,871) for the subgroup, plus the estimated value for shipments valued at $250 or less ($67,020).

The value of $67,020 shown for SAMPLE is the amount which is estimated, on the basis of the sample, to have been imported in shipments valued at $250 or less for the subgroup. The figure 41 identified by a double asterisk (**) immediately after the word SAMPLE indicates that there were 41 shipments for the subgroup in

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

the sample. The use of number of shipments in sample to obtain a measure of the reliability of the estimate of the shipments $250 or less, and of the subgroup total which includes it, is explained in paragraph F below.

The value of $12,769,871 shown on the same line with OVER 250 is the total for the subgroup of the fully compiled data for shipments valued at over $250. This total is made up of the detailed statistics in the report shown on a Schedule A commodity by country of origin basis under the heading OVER 250 DATA SHOWN BELOW.

With allowances for sampling variability in the estimates, a measure of which can be obtained as explained in paragraph F below, the undercounting in a particular commodity or commodity by country figure, or any combination thereof within a commodity subgroup, would not be exptected to be greater than the total amount of the low-value estimate for the subgroup shown on the line labeled SAMPLE. In many instances this measure will tend to greatly overstate the limits of the undercounting. The user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total of low-value shipments for the subgroup among the detailed items which appear or which might have appeared for the subgroup in the report. In those cases where no data labeled SAMPLE appear for the subgroup, it can be known that no low-value items for the subgroup appeared in the sample, but this does not necessarily mean that no low-value shipments were made for the subgroup. Similarly, the absence of a Schedule A commodity from the report, or the absence of a country name for a commodity, indicates that there were no imports over $250, but does not necessarily mean that no imports $250 or less were made.

Some indication of the undercounting on a 4-digit Schedule A commodity basis without regard to country is provided in the February 1954 *Notes*, in the form of data for a sample month. Users interested in additional information for particular commodities may make inquiry of the Bureau as to the information available.

When considering the undercounting in January 1954 or subsequent months' detailed figures for purposes of evaluating its effect on comparisons with corresponding figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanation of any sampling procedures used are also included in the issues of Report No. FT 110 for the individual months of 1953. In summary, informal entries were excluded from all import statistics for 1953, and imports on formal entries under $100 were excluded from the detailed figures for the months January December 1953.

F. The Accuracy of the Sample Estimates of Imports Individually Valued $250 or Less.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tsbulation is not expected. The extent to which the estimated commodity subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in this report, the number in the sample on which the estimate was based is given.

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimated increased by
0	0	[2]$2,200
1	$1,600	4,400
2	2,500	5,100
3	3,200	5,600
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,800	9,800
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499[3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup total is the fully compiled figure for imports $250 or more, shown separately for each subgroup in this report, plus 1/20 of the estimated amount shown for $1 to $250 imports.

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

The illustration given in section E above shows an estimated value of $67,020 based on 41 shipments in the sample. Referring to the line "40-49" in the above table, one notes the values $12,400 and $14,200. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $54,620 ($67,020 reduced by $12,400) and $81,220 ($67,020 increased by $14,200). Similarly, the subgroup total of $12,836,891 in the illustration in section E, which represent a combination of the total of $12,769,871 for the fully compiled data for shipments valued at over $250 plus the estimated value of $67,020 based on 41 shipments in the sample would be between $12,824,491 ($12,836,891 reduced by $12,400) and $12,851,091 ($12,836,891 increased by $14,200).

In the event a user desires to combine two or more commodity subgroup figures which are estimated values or include estimated values the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

G. The Effect of the Changes in Procedure on the Commodity Subgroup, Commodity Group and Over-all Totals.

The over-all import total has been increased by approximately $4 million per month by the inclusion of informal entries. Some indication of the distribution of this increase by commodity subgroup and commodity group is presented in the February 1954 issue of the *Notes*. Users interested in this information for particular commodities may make inquiry of the Bureau as to the information available.

These totals are all further affected by the fact that they now include estimates, and are therefore subject to sampling variability. A statistical measure of the sampling variability can be obtained in all cases by the method described in paragraph F above. However, the variability in the over-all total and in the commodity group totals is expected to be insignificant. The effect of sampling on the reliability of the commodity subgroup totals is less than 5 percent for all but a few of the commodity subgroup figures. The few exceptions are commodity subgroup figures with relatively small (under $200,000) totals.

A further effect of the changes in procedure on the summary figures is that inclusion of the entire estimated amounts for formal entry import items valued at $250 or less in the commodity subgroup and the commodity group totals in which they belong, effective January 1954, may affect, to a relatively minor extent, the comparability of these totals with the corresponding totals for the period July through December 1953. During the period July through December 1953 estimates of formal entry items valued at less than $100 were included in the total for commodity group 9 "Miscellaneous" and were excluded from the subgroup and group totals as well as from the commodity and commodity by country data.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular subgroups and commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $250.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

TABLE OF CONTENTS

Description	Schedule A Commodity Code No.	Page No.
GROUP 00 - ANIMALS AND ANIMAL PRODUCTS, EDIBLE		
Animals, edible (except for breeding)	0010600-0015500	8
Meat products	0018300-0035500	8
Animal oils and fats, edible	0036000-0036900	8
Dairy products	0037000-0046990	8
Fish and fish products, except shellfish	0047000-0079590	8
Shellfish and products	0080100-0087900	8
Other edible animal products	0088100-0097900	9
GROUP 0 - ANIMALS AND ANIMAL PRODUCTS, INEDIBLE		
Hides and skins, raw (except furs)	0201000-0299900	10
Leather	0300100-0345900	10
Leather, rawhide, and parchment manufactures	0350300-0699990	11
Furs and manufactures	0701000-0759900	11
Animal and fish oils, fats, and greases, inedible	0803000-0821600	12
Other inedible animals and animal products	0840000-0990290	12
GROUP 1 - VEGETABLE FOOD PRODUCTS AND BEVERAGES		
Grains and preparations	1020000-1090260	13
Fodders and feeds, n.e.s.	1101000-1190800	13
Vegetables and preparations	1191100-1250990	13
Fruits and preparations	1290000-1330990	14
Nuts and preparations	1350000-1380140	15
Vegetable oils and fats, edible	1420000-1428900	15
Cocoa, coffee, and tea	1501300-1521000	15
Spices	1523100-1550590	15
Sugar and related products	1570000-1654800	16
Beverages	1711300-1900000	16
GROUP 2 - VEGETABLE PRODUCTS, INEDIBLE, EXCEPT FIBERS AND WOOD		
Rubber and allied gums and manufactures	2011000-2098900	17
Gums, resins, and balsams, n.e.s.	2102000-2189400	17
Drugs, herbs, leaves, roots, etc.	2201000-2220490	17
Oil seeds	2231000-2240700	18
Vegetable oils and vegetable waxes	2241000-2290590	18
Dyeing and tanning materials	2302000-2345950	18
Seeds, except oil seeds	2401000-2460990	18
Nursery and greenhouse stock	2501000-2599100	19
Tobacco and manufactures	2601000-2629900	19
Miscellaneous vegetable products	2800000-2960150	19
GROUP 3 - TEXTILE FIBERS AND MANUFACTURES		
Cotton unmanufactured	3001010-3005000	19
Cotton semimanufactures	3006150-3020999	19
Cotton manufactures	3030000-3230800	19
Jute and manufactures	3241000-3250900	20
Flax, hemp, and ramie, and manufactures	3261000-3390590	21
Other vegetable fibers and manufactures	3401000-3421990	21
Wool, unmanufactured	3501000-3541000	22
Wool semimanufactures	3550000-3574600	23
Wool manufactures	3607000-3680800	23
Hair and manufactures, n.e.s.	3690000-3698900	25
Silk, unmanufactured	3702000-3704200	25
Silk manufactures	3705100-3799900	25
Manufactures of rayon or other Man-made (synthetic) textile	3800000-3880490	25
Miscellaneous textile products	3900100-3981100	26
GROUP 4 - WOOD AND PAPER		
Wood, unmanufactured	4007100-4080500	27
Sawmill products (lumber)	4103100-4207555	27
Wood manufactures	4208000-4280990	27
Cork and manufactures	4300000-4321900	28
Paper base stocks	4590000-4692900	28
Paper and manufactures	4711000-4799990	28
GROUP 5 - NONMETALLIC MINERALS		
Coal and related fuels	5001000-5014300	29
Petroleum and products	5052100-5079100	29
Stone, lime, cement, gypsum, and gypsum products	5080250-5193900	29
Glass and glass products	5200400-5290900	30
Clay and clay products	5300000-5390700	31
Other nonmetallic minerals and manufactures (except precious stones and imitations)	5391000-5930980	31
Precious and semiprecious stones and imitations and industrial diamonds	5950000-5958200	32
GROUP 6 - METALS AND MANUFACTURES, EXCEPT MACHINERY AND VEHICLES		
Iron ore and concentrates	6001000-6001100	33
Iron and steel semimanufactures	6002000-6060300	33
Steel mill products—manufactures	6081020-6116100	33
Iron and steel advanced manufactures	6117000-6200990	34
Ferro-alloys, ores, and metals, n.e.s.	6211000-6270900	35
Nonferrous metals, except precious	6301000-6790990	36
Precious metals, jewelry, and plated ware	6820000-6900550	36
GROUP 7 - MACHINERY AND VEHICLES		
Electrical machinery and apparatus	7063200-7100990	38
Engines, turbines, and parts, n.e.s.	7110000-7110700	39
Other machinery, except agricultural	7400200-7800990	39
Agricultural machinery and implements	7850000-7890190	40
Vehicles, except agricultural	7900100-7940290	40
GROUP 8 - CHEMICALS AND RELATED PRODUCTS		
Coal-tar products	8001000-8090900	41
Medicinal and pharmaceutical preparations	8102000-8150600	41
Industrial chemicals	8170040-8380982	41
Pigments, paints, and varnishes	8400100-8441300	42
Fertilizers and fertilizer materials	8500000-8559900	42
Explosives, fireworks, and ammunition	8620000-8695000	43
Soap and toilet preparations	8712300-8731200	43
GROUP 9 - MISCELLANEOUS		
Photographic goods	9001000-9036600	43
Scientific and professional instruments, apparatus, and supplies, n.e.s.	9140200-9180290	43
Musical instruments, parts, and accessories	9200000-9280700	44
Dolls and toys, athletic and sporting goods	9400000-9439990	44
Firearms	9470000-9477000	44
Books, maps, pictures, and other printed matter, n.e.s.	9500000-9530890	44
Clocks, watches, clockwork mechanisms, and parts	9540100-9590099	45
Art works and antiques	9610000-9670300	46
Miscellaneous articles, n.e.s.	9700000-9990750	46
REVISIONS	.....	48

UNITS OF QUANTITY

[The following is a list of the abbreviations for units of quantity used in this report. When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively.)]

Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity
AOZ	Advoirdupois Ounce	DPC	Dozen Pieces	LF	Leaf	PK	Pack
BBL	Barrel	DPR	Dozen Pair	LFT	Linear Foot	PR	Pair
BFT	Board Foot	FT	Foot	LTN	Long Ton	RM	Ream
BU	Bushel	GAL	Gallon	M	Thousand	RSQ	Roof Square
BUN	Bunch	GBX	Gross Boxes	MBF	Thousand Board Feet	SFT	Square Foot
CAR	Carat	GLB	Pound (gross weight)	MCF	Thousand Cubic Feet	SQI	Square Inch
CD	Cord	GR	Gross	MFT	Thousand Feet	STN	Short Ton
CFT	Cubic Foot	GRL	Gross Lines	MG	Milligram	SUF	Superficial Foot
CLB	Pound (net content)	GTN	Ton (gross weight)	NO	Number	SYD	Square Yard
CRT	Crate	IN	Inch	PC	Piece	TOZ	Troy Ounce
CTN	Ton (net content)	LB	Pound	PFG	Proof Gallon	WSQ	Wall Square

**"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - (includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Errors from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

MARCH 1955

**import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**"Import date on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information end use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. 0th Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double esterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. 0th Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

[2]Classification combined since errors may exist in the distinction between imports reported for them. (See "Imports of Blown Glassware," January 1953 issue of FTSN.)

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import date on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

REPORT NO. FT 110

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedure.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (not shown in this report, but published in FT 120 and FT 950).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity group totals (shown at the end of each commodity group in this report).
6. The commodity subgroup totals (included in this report for the first time effective January 1954 in order that users may have ready access, as more fully explained below, to available information on the undercounting in the individual Schedule A classifications in each subgroup resulting from the changed compiling procedure).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by Customs District, etc.

E. The Extent of Undercounting in the Schedule A Commodity Totals and Commodity by Country Statistics in this Report Resulting from Omission of Imports $250 or Less.

Since the monthly total for shipments individually valued $250 or less is in the neighborhood of $8 million ($4 million on informal and $4 million on formal entries) and represents only about 1 percent of the value of all imports, the undercounting for all detailed figures taken as a whole is not great, but it is possible that a high degree of undercounting in individual detailed figures may result. Since the smallest commodity breakdown of the estimated information on shipments valued $250 or less is on a subgroup basis, the amount estimated for each subgroup is the best available indication of the magnitude of the undercounting in the sum of the individual Schedule A classifications in that subgroup. In order that users of the data in Report No. FT 110 may have ready access to this distribution of the $8 million on a subgroup basis, and in order to call attention to the fact that the detailed statistics represent information on shipments over $250 only, subgroup total information has been inserted in the report immediately preceding the data for the first Schedule A commodity number in each subgroup as illustrated:

COMMODITY DESCRIPTION AND UNIT OF QUANTITY SCHEDULE A NUMBER		
COUNTRY OF ORIGIN	NET QUANTITY	VALUE (DOLLARS)
MEAT PRODUCTS		
TOTAL		12,836,891
SAMPLE 41**		67,020
OVER 250		12,769,871
OVER 250 DATA SHOWN BELOW		
BEEF BONE IN FRESH CHLD FROZN		LB
0018300	694,308	198,924
CANADA	241,977	69,781
DOM REP	359,773	104,327
AUSTRAL	87,655	22,247
OTH CTY	4,903	2,569

The value of $12,836,891 shown for TOTAL, immediately below the commodity subgroup description MEAT PRODUCTS is the subgroup total, made up of the fully compiled shipments valued over $250 ($12,769,871) for the subgroup, plus the estimated value for shipments valued at $250 or less ($67,020).

The value of $67,020 shown for SAMPLE is the amount which is estimated, on the basis of the sample, to have been imported in shipments valued at $250 or less for the subgroup. The figure 41 identified by a double asterisk (**) immediately after the word SAMPLE indicates that there were 41 shipments for the subgroup in

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

the sample. The use of number of shipments in sample to obtain a measure of the reliability of the estimate of the shipments $250 or less, and of the subgroup total which includes it, is explained in paragraph F below.

The value of $12,769,871 shown on the same line with OVER 250 is the total for the subgroup of the fully compiled data for shipments valued at over $250. This total is made up of the detailed statistics in the report shown on a Schedule A commodity by country of origin basis under the heading OVER 250 DATA SHOWN BELOW.

With allowances for sampling variability in the estimates, a measure of which can be obtained as explained in paragraph F below, the undercounting in a particular commodity or commodity by country figure, or any combination thereof within a commodity subgroup, would not be exptected to be greater than the total amount of the low-value estimate for the subgroup shown on the line labeled SAMPLE. In many instances this measure will tend to greatly overstate the limits of the undercounting. The user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total of low-value shipments for the subgroup among the detailed items which appear or which might have appeared for the subgroup in the report. In those cases where no data labeled SAMPLE appear for the subgroup, it can be known that no low-value items for the subgroup appeared in the sample, but this does not necessarily mean that no low-value shipments were made for the subgroup. Similarly, the absence of a Schedule A commodity from the report, or the absence of a country name for a commodity, indicates that there were no imports over $250, but does not necessarily mean that no imports $250 or less were made.

Some indication of the undercounting on a 4-digit Schedule A commodity basis without regard to country is provided in the February 1954 *Notes*, in the form of data for a sample month. Users interested in additional information for particular commodities may make inquiry of the Bureau as to the information available.

When considering the undercounting in January 1954 or subsequent months' detailed figures for purposes of evaluating its effect on comparisons with corresponding figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanation of any sampling procedures used are also included in the issues of Report No. FT 110 for the individual months of 1953. In summary, informal entries were excluded from all import statistics for 1953, and imports on formal entries under $100 were excluded from the detailed figures for the months January - December 1953.

F. The Accuracy of the Sample Estimates of Importa Individually Valued $250 or Lesa.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated commodity subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each eatimated figure in thia report, the number in the sample on which the estimate was based is given.

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or lesa included in the sample, as indicated by the sample card count, ia	Then the chances are better than 2 out of 3 that a complete tabulation whould have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimated increased by
0	0	[2]$2,200
1	$1,600	4,400
2	2,500	5,100
3	3,200	5,600
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,800	3,800
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	13,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,300
300 - 399	37,000	39,000
400 - 499[3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup total is the fully compiled figure for imports $250 or more, shown separately for each subgroup in this report, plus 1/20 of the estimated amount shown for $1 to $250 imports.

[2] Where commodities normally are not imported, an indication of zero shipments in the aample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimatea of the low-value shipments will generally be less than 7 percent; and (b) the aampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combinad, will generally be less than 1 percent.

The illustration given in section E above shows an estimated value of $67,020 based on 41 shipments in the sample. Referring to the line "40-49" in the above table, one notes the values $12,400 and $14,200. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $54,620 ($67,020 reduced by $12,400) and $81,220 ($67,020 increased by $14,200). Similarly, the subgroup total of $12,836,891 in the illustration in aection E, which represent a combination of the total of $12,769,871 for the fully compiled data for shipments valued at over $250 plus the estimated value of $67,020 based on 41 shipments in the sample would be between $12,824,491 ($12,836,891 reduced by $12,400) and $12,851,091 ($12,836,891 increased by $14,200).

In the event a user desires to combine two or more commodity subgroup figures which are estimated values or include estimated values the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

G. The Effect of the Changes in Procedure on the Commodity Subgroup, Commodity Group and Over-all Totals.

The over-all import total has been increased by approximately $4 million per month by the inclusion of informal entries. Some indication of the distribution of this increase by commodity subgroup and commodity group is presented in the Februsry 1954 issue of the *Notes*. Users interested in this information for particulsr commodities may make inquiry of the Bureau ss to the information svsilable.

These totals are all further affected by the fact that they now include estimates, and are therefore subject to sampling vsriability. A statistical messure of the sampling variability can be obtained in all cases by the method described in paragraph F above. However, the variability in the over-all total and in the commodity group totals is expected to be insignificant. The effect of sampling on the reliability of the commodity subgroup totals is less than 5 percent for all but a few of the commodity subgroup figures. The few exceptions are commodity subgroup figures with relatively small (under $200,000) totals.

A further effect of the changes in procedure on the summary figures is that inclusion of the entire estimated amounts for formal entry import items valued at $250 or less in the commodity subgroup and the commodity group totals in which they belong, effective January 1954, may affect, to a relatively minor extent, the comparability of these totals with the corresponding totals for the period July through December 1953. During the period July through December 1953 estimates of formal entry items valued at less than $100 were included in the total for commodity group 9 "Miscellaneous" and were excluded from the subgroup andgroup totals aswell as from the commodity and commodity by country data.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular subgroups and commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $250.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

TABLE OF CONTENTS

Description	Schedule A Commodity Code No.	Page No.
GROUP 00 - ANIMALS AND ANIMAL PRODUCTS, EDIBLE		
Animals, edible (except for breeding)	0010600-0015500	8
Meat products	0018300-0035500	8
Animal oils and fats, edible	0036000-0036900	8
Dairy products	0037000-0046990	8
Fish and fish products, except shellfish	0047000-0079590	8

UNITS OF QUANTITY

[The following is a list of the abbreviations for units of quantity used in this report. When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively.)]

Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity
AOZ	Advoirdupois Ounce	DPC	Dozen Pieces	LF	Leaf	PK	Pack
BBL	Barrel	DPR	Dozen Pair	LFT	Linear Foot	PR	Pair
BFT	Board Foot	FT	Foot	LTN	Long Ton	RM	Ream
BU	Bushel	GAL	Gallon	M	Thousand	RSQ	Roof Square
BUN	Bunch	GBX	Gross Boxes	MBF	Thousand Board Feet	SFT	Square Foot
CAR	Carat	GLB	Pound (gross weight)	MCF	Thousand Cubic Feet	SQI	Square Inch
CD	Cord	GR	Gross	MFT	Thousand Feet	STN	Short Ton
CFT	Cubic Foot	GRL	Gross Lines	MG	Milligram	SUF	Superficial Foot
CLB	Pound (net content)	GTN	Ton (gross weight)	NO	Number	SYD	Square Yard
CRT	Crate	IN	Inch	PC	Piece	TOZ	Troy Ounce
CTN	Ton (net content)	LB	Pound	PFG	Proof Gallon	WSQ	Wall Square

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**"Import date on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. 6th Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

APRIL 1955

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty = includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimate.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity end commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

[2]Classification combined since errors may exist in the distinction between imports reported for them. (See "Imports of Blown Glassware," January 1953 issue of FTSR.)

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates. 1Country of Shipment - (Country of Origin Unknown)
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double esterisk) to determine reliability of estimates.

*Imports from eac country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

REPORT NO. FT 110

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedure.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (not shown in this report, but published in FT 120 and FT 950).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity group totals (shown at the end of each commodity group in this report).
6. The commodity subgroup totals (included in this report for the first time effective January 1954 in order that users may have ready access, as more fully explained below, to available information on the undercounting in the individual Schedule A classifications in each subgroup resulting from the changed compiling procedure).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by Customs District, etc.

E. The Extent of Undercounting in the Schedule A Commodity Totals and Commodity by Country Statistics in this Report Resulting from Omission of Imports $250 or Less.

Since the monthly total for shipments individually valued $250 or less is in the neighborhood of $8 million ($4 million on informal and $4 million on formal entries) and represents only about 1 percent of the value of all imports, the undercounting for all detailed figures taken as a whole is not great, but it is possible that a high degree of undercounting in individual detailed figures may result. Since the smallest commodity breakdown of the estimated information on shipments valued $250 or less is on a subgroup basis, the amount estimated for each subgroup is the best available indication of the magnitude of the undercounting in the sum of the individual Schedule A classifications in that subgroup. In order that users of the data in Report No. FT 110 may have ready access to this distribution of the $8 million on a subgroup basis, and in order to call attention to the fact that the detailed statistics represent information on shipments over $250 only, subgroup total information has been inserted in the report immediately preceding the data for the first Schedule A commodity number in each subgroup as illustrated:

COMMODITY DESCRIPTION AND UNIT OF QUANTITY
SCHEDULE A NUMBER

COUNTRY OF ORIGIN	NET QUANTITY	VALUE (DOLLARS)
MEAT PRODUCTS		
TOTAL		12,836,891
SAMPLE 41**		67,020
OVER 250		12,769,871
OVER 250 DATA SHOWN BELOW		
BEEF BONE IN FRESH CNLD FROZN		LB
0018300	694,308	198,924
CANADA	241,977	69,781
DOM REP	359,773	104,327
AUSTRAL	87,655	22,247
OTH CTY	4,903	2,569

The value of $12,836,891 shown for TOTAL, immediately below the commodity subgroup description MEAT PRODUCTS is the subgroup total, made up of the fully compiled shipments valued over $250 ($12,769,871) for the subgroup, plus the estimated value for shipments valued at $250 or less ($67,020).

The value of $67,020 shown for SAMPLE is the amount which is estimated, on the basis of the sample, to have been imported in shipments valued at $250 or less for the subgroup. The figure 41 identified by a double asterisk (**) immediately after the word SAMPLE indicates that there were 41 shipments for the subgroup in

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

the sample. The use of number of shipments in sample to obtain a measure of the reliability of the estimate of the shipments $250 or less, and of the subgroup total which includes it, is explained in paragraph F below.

The value of $12,769,871 shown on the same line with OVER 250 is the total for the subgroup of the fully compiled data for shipments valued at over $250. This total is made up of the detailed statistics in the report shown on a Schedule A commodity by country of origin basis under the heading OVER 250 DATA SHOWN BELOW.

With allowances for sampling variability in the estimates, a measure of which can be obtained as explained in paragraph F below, the undercounting in a particular commodity or commodity by country figure, or any combination thereof within a commodity subgroup, would not be exptected to be greater than the total amount of the low-value estimate for the subgroup shown on the line labeled SAMPLE. In many instances this measure will tend to greatly overstate the limits of the undercounting. The user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total of low-value shipments for the subgroup among the detailed items which appear or which might have appeared for the subgroup in the report. In those cases where no data labeled SAMPLE appear for the subgroup, it can be known that no low-value items for the subgroup appeared in the sample, but this does not necessarily mean that no low-value shipments were made for the subgroup. Similarly, the absence of a Schedule A commodity from the report, or the absence of a country name for a commodity, indicates that there were no imports over $250, but does not necessarily mean that no imports $250 or less were made.

Some indication of the undercounting on a 4-digit Schedule A commodity basis without regard to country is provided in the February 1954 *Notes*, in the form of data for a sample month. Users interested in additional information for particular commodities may make inquiry of the Bureau as to the information available.

When considering the undercounting in January 1954 or subsequent months' detailed figures for purposes of evaluating its effect on comparisons with corresponding figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanation of any sampling procedures used are also included in the issues of Report No. FT 110 for the individual months of 1953. In summary, informal entries were excluded from all import statistics for 1953, and imports on formal entries under $100 were excluded from the detailed figures for the months January - December 1953.

F. The Accuracy of the Sample Estimates of Imports Individually Valued $250 or Less.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated commodity subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in this report, the number in the sample on which the estimate was based is given.

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimated increased by
0	0	[2]$2,200
1	$1,600	4,400
2	2,500	5,100
3	3,200	5,600
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,800	3,800
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499[3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup total is the fully compiled figure for imports $250 or more, shown separately for each subgroup in this report, plus 1/20 of the estimated amount shown for $1 to $250 imports.

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

The illustration given in section E above shows an estimated value of $67,020 based on 41 shipments in the sample. Referring to the line "40-49" in the above table, one notes the values $12,400 and $14,200. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $54,620 ($67,020 reduced by $12,400) and $81,220 ($67,020 increased by $14,200). Similarly, the subgroup total of $12,836,891 in the illustration in section E, which represent a combination of the total of $12,769,871 for the fully compiled data for shipments valued at over $250 plus the estimated value of $67,020 based on 41 shipments in the sample would be between $12,824,491 ($12,836,891 reduced by $12,400) and $12,851,091 ($12,836,891 increased by $14,200).

In the event a user desires to combine two or more commodity subgroup figures which are estimated values or include estimated values the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

G. The Effect of the Changes in Procedure on the Commodity Subgroup, Commodity Group and Over-all Totals.

The over-all import total has been increased by approximately $4 million per month by the inclusion of informal entries. Some indication of the distribution of this increase by commodity subgroup and commodity group is presented in the February 1954 issue of the *Notes*. Users interested in this information for particular commodities may make inquiry of the Bureau as to the information available.

These totals are all further affected by the fact that they now include estimates, and are therefore subject to sampling variability. A statistical measure of the sampling variability can be obtained in all cases by the method described in paragraph F above. However, the variability in the over-all total and in the commodity group totals is expected to be insignificant. The effect of sampling on the reliability of the commodity subgroup totals is less than 5 percent for all but a few of the commodity subgroup figures. The few exceptions are commodity subgroup figures with relatively small (under $200,000) totals.

A further effect of the changes in procedure on the summary figures is that inclusion of the entire estimated amounts for formal entry import items valued at $250 or less in the commodity subgroup and the commodity group totals in which they belong, effective January 1954, may affect, to a relatively minor extent, the comparability of these totals with the corresponding totals for the period July through December 1953. During the period July through December 1953 estimates of formal entry items valued at less than $100 were included in the total for commodity group 9 "Miscellaneous" and were excluded from the subgroup and group totals as well as from the commodity and commodity by country data.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular subgroups and commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $250.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

UNITS OF QUANTITY

[The following is a list of the abbreviations for units of quantity used in this report. When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively.)]

Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity
AOZ	Advoirdupois Ounce	DPC	Dozen Pieces	LF	Leaf	PK	Pack
BBL	Barrel	DPR	Dozen Pair	LFT	Linear Foot	PR	Pair
BFT	Board Foot	FT	Foot	LTN	Long Ton	RM	Ream
BU	Bushel	GAL	Gallon	M	Thousand	RSQ	Roof Square
BUN	Bunch	GBX	Gross Boxes	MBF	Thousand Board Feet	SFT	Square Foot
CAR	Carat	GLB	Pound (gross weight)	MCF	Thousand Cubic Feet	SQI	Square Inch
CD	Cord	GR	Gross	MFT	Thousand Feet	STN	Short Ton
CFT	Cubic Foot	GRL	Gross Lines	MG	Milligram	SUF	Superficial Foot
CLB	Pound (net content)	GTN	Ton (gross weight)	NO	Number	SYD	Square Yard
CRT	Crate	IN	Inch	PC	Piece	TOZ	Troy Ounce
CTN	Ton (net content)	LB	Pound	PFG	Proof Gallon	WSQ	Wall Square
DOZ	Dozen					YD	Yard

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informel entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summery totals. See explenation on page 4 for further information and use of number of shipments in sample (shown at left of double esterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

¹Country of Shipment (Country of Origin Unknown)

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates. [1]Country of Shipment - (Country of Origin Unknown)

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

GROUP TOTAL		84781686	

**"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

SClassification combined since errors may exist in the distinction between imports reported for them. (See "Imports of Blown Glassware," January 1955 issue of FT990.)

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000. [1]Country of Shipment (Country of Origin Unknown).

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 20,000. Oth Cty - includes countries from which imports are less than 20,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summery totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 20,000. Oth Cty - includes countries from which imports are less than 20,000.

REPORT NO. FT 110

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistmcs prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedure.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (not shown in this report, but published in FT 120 and FT 950).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity group totals (shown at the end of each commodity group in this report).
6. The commodity subgroup totals (included in this report for the first time effective January 1954 in order that users may have ready access, as more fully explained below, to available information on the undercounting in the individual Schedule A classifications in each subgroup resulting from the changed compiling procedure).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by Customs District, etc.

E. The Extent of Undercounting in the Schedule A Commodity Totals and Commodity by Country Statistics in this Report Resulting from Omission of Imports $250 or Less.

Since the monthly total for shipments individually valued $250 or less is in the neighborhood of $8 million ($4 million on informal and $4 million on formal entries) and represents only about 1 percent of the value of all imports, the undercounting for all detailed figures taken as a whole is not great, but it is possible that a high degree of undercounting in individual detailed figures may result. The smallest commodity breakdown of the estimated information on shipments valued $250 or less, published monthly, is on a subgroup basis. This amount estimated for each subgroup is one indication of the magnitude of the undercounting in the sum of the individual Schedule A classifications in that subgroup. In order that users of the data in Report No. FT 110 may have ready access to this distribution of the $8 million on a subgroup basis, and in order to call attention to the fact that the detailed statistics represent information on shipments over $250 only, subgroup total information has been inserted in the report immediately preceding the data for the first Schedule A commodity number in each subgroup as illustrated:

COMMODITY DESCRIPTION AND UNIT OF QUANTITY SCHEDULE A NUMBER		
COUNTRY OF ORIGIN	NET QUANTITY	VALUE (DOLLARS)
MEAT PRODUCTS		
TOTAL		12,836,891
SAMPLE 41**		67,020
OVER 250		12,769,871
OVER 250 DATA SHOWN BELOW		
BEEF BONE IN FRESH CHLD FROZN		LB
0018300	694,308	198,924
CANADA	241,977	69,781
DOM REP	359,773	104,327
AUSTRAL	87,655	22,247
OTH CTY	4,903	2,569

The value of $12,836,891 shown for TOTAL, immediately below the commodity subgroup description MEAT PRODUCTS is the subgroup total, made up of the fully compiled shipments valued over $250 ($12,769,871) for the subgroup, plus the estimated value for shipments valued at $250 or less ($67,020).

The value of $67,020 shown for SAMPLE is the amount which is estimated, on the basis of the sample, to have been imported in shipments valued at $250 or less for the subgroup. The figure 41 identified by a double asterisk (**) immediately after the word SAMPLE indicates that there were 41 shipments for the subgroup in

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

the sample. The use of number of shipments in sample to obtain a measure of the reliability of the estimate of the shipments $250 or less, and of the subgroup total which includes it, is explained in paragraph F below.

The value of $12,769,871 shown on the same line with OVER 250 is the total for the subgroup of the fully compiled data for shipments valued at over $250. This total is made up of the detailed statistics in the report shown on a Schedule A commodity by country of origin basis under the heading OVER 250 DATA SHOWN BELOW.

With allowances for sampling variability in the estimates, a measure of which can be obtained as explained in paragraph F below, the undercounting in a particular commodity or commodity by country figure, or any combination thereof within a commodity subgroup, would not be expected to be greater than the total amount of the low value estimate for the subgroup shown on the line labeled SAMPLE. In many instances this measure will tend to greatly overstate the limits of the undercounting. The user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total of low-value shipments for the subgroup among the detailed items which appear or which might have appeared for the subgroup in the report. In those cases where no data labeled SAMPLE appear for the subgroup, it can be known that no low-value items for the subgroup appeared in the sample, but this does not necessarily mean that no low-value shipments were made for the subgroup. Similarly, the absence of a Schedule A commodity from the report, or the absence of a country name for a commodity, indicates that there were no imports over $250, but does not necessarily mean that no imports $250 or less were made.

An additional indication of the undercounting on a seven-digit Schedule A commodity basis without regard to country, during calendar year 1954, may be obtained from the Appendix to the calendar year 1954 issue of Report No. FT 110.

When considering the undercounting in January 1954 or subsequent months' detailed figures for purposes of evaluating its effect on comparisons with corresponding figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanation of any sampling procedures used are also included in the issues of Report No. FT 110 for the individual months of 1953. In summary, informal entries were excluded from all import statistics for 1953, and imports on formal entries under $100 were excluded from the detailed figures for the months January - December 1953.

F. The Accuracy of the Sample Estimates of Imports Individually Valued $250 or Less.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated commodity subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in this report, the number in the sample on which the estimate was based is given.

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation whould have resulted in a value figure between

7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,800	9,800
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,900
300 - 399	37,000	39,000
400 - 499[3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup total is the fully compiled figure for imports $250 or more, shown separately for each subgroup in this report, plus 1/20 of the estimated amount shown for $1 to $250 imports.

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

The illustration given in section E above shows an estimated value of $67,020 based on 41 shipments in the sample. Referring to the line "40-49" in the above table, one notes the values $12,400 and $14,200. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $54,620 ($67,020 reduced by $12,400) and $81,220 ($67,020 increased by $14,200). Similarly, the subgroup total of $12,836,891 in the illustration in section E, which represent a combination of the total of $12,769,871 for the fully compiled data for shipments valued at over $250 plus the estimated value of $67,020 based on 41 shipments in the sample would be between $12,824,491 ($12,836,891 reduced by $12,400) and $12,851,091 ($12,836,891 increased by $14,200).

In the event a user desires to combine two or more commodity subgroup figures which are estimated values or include estimated values the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

G. The Effect of the Changes in Procedure on the Commodity Subgroup, Commodity Group and Over-all Totals.

The over-all import total has been increased by approximately $4 million per month by the inclusion of informal entries. Some indication of the distribution of this increase by commodity subgroup and commodity group is presented in the February 1954 issue of the *Notes*. Users interested in this information for particular commodities may make inquiry of the Bureau as to the information available.

These totals are all further affected by the fact that they now include estimates, and are therefore subject to sampling variability. A statistical measure of the sampling variability can be obtained in all cases by the method described in paragraph F above. However, the variability in the over-all total and in the commodity group totals is expected to be insignificant. The effect of sampling on the reliability of the commodity subgroup totals is less than 5 percent for all but a few of the commodity subgroup figures. The few exceptions are commodity subgroup figures with relatively small (under $200,000) totals.

A further effect of the changes in procedure on the summary figures is that inclusion of the entire estimated amounts for formal entry import items valued at $250 or less in the commodity subgroup and the commodity group totals in which they belong, effective January 1954, may affect, to a relatively minor extent, the comparability of these totals with the corresponding totals for the period July through December 1953. During the period July through December 1953 estimates of formal entry items valued at less than $100 were included in the total for commodity group 9 "Miscellaneous" and were excluded from the subgroup and group totals as well as from the commodity and commodity by country data.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular subgroups and commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $250.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

TABLE OF CONTENTS

Description	Schedule A Commodity Code No.	Page No.
GROUP 00 - ANIMALS AND ANIMAL PRODUCTS, EDIBLE		
Animals, edible (except for breeding)	0010600-0015500	8
Meat products	0018300-0035500	8
Animal oils and fats, edible	0036000-0036900	8
Dairy products	0037000-0046990	8
Fish and fish products, except shellfish	0047000-0079590	8
Shellfish and products	0080100-0087900	9
Other edible animal products	0088100-0097900	9
GROUP 0 - ANIMALS AND ANIMAL PRODUCTS, INEDIBLE		
Hides and skins, raw (except furs)	0201000-0299900	10
Leather	0300100-0345900	10
Leather, rawhide, and parchment manufactures	0350300-0699990	11
Furs and manufactures	0701000-0759900	12
Animal and fish oils, fats, and greases, inedible	0803000-0821600	12
Other inedible animals and animal products	0840000-0990290	12
GROUP 1 - VEGETABLE FOOD PRODUCTS AND BEVERAGES		
Grains and preparations	1020000-1090260	13
Fodders and feeds, n.e.s	1101000-1190800	13
Vegetables and preparations	1191100-1250990	13
Fruits and preparations	1290000-1330990	14
Nuts and preparations	1350000-1380140	14
Vegetable oils and fats, edible	1420000-1428900	15
Cocoa, coffee, and tea	1501300-1521000	15
Spices	1523100-1550590	15
Sugar and related products	1570000-1654800	15
Beverages	1711300-1900000	16
GROUP 2 - VEGETABLE PRODUCTS, INEDIBLE, EXCEPT FIBERS AND WOOD		
Rubber and allied gums and manufactures	2011000-2098900	16
Gums, resins, and balsams, n.e.s	2102000-2189400	17
Drugs, herbs, leaves, roots, etc	2201000-2220490	17
Oil seeds	2231000-2240700	17
Vegetable oils and vegetable waxes	2241000-2290590	17
Dyeing and tanning materials	2302000-2345950	18
Seeds, except oil seeds	2401000-2460990	18
Nursery and greenhouse stock	2501000-2599100	18
Tobacco and manufactures	2601000-2629900	18
Miscellaneous vegetable products	2800000-2960150	18
GROUP 3 - TEXTILE FIBERS AND MANUFACTURES		
Cotton unmanufactured	3001010-3005000	19
Cotton semimanufactures	3006150-3020999	19
Cotton manufactures	3030000-3230800	19
Jute and manufactures	3241000-3250900	20
Flax, hemp, and ramie, and manufactures	3261000-3390590	20
Other vegetable fibers and manufactures	3401000-3421990	21
Wool, unmanufactured	3501000-3541000	21
Wool semimanufactures	3550000-3574600	22
Wool manufactures	3607000-3680800	23
Hair and manufactures, n.e.s	3690000-3698900	24
Silk, unmanufactured	3702000-3704200	24
Silk manufactures	3705100-3799900	24
Manufactures of rayon or other Man-made (synthetic) textile	3800000-3880490	25
Miscellaneous textile products	3900100-3981100	25
GROUP 4 - WOOD AND PAPER		
Wood, unmanufactured	4007100-4080500	26
Sawmill products (lumber)	4103100-4207555	26
Wood manufactures	4208000-4280990	27
Cork and manufactures	4300000-4321900	27

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. 0th Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

JUNE 1955

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. 0th Cty - includes countries from which imports are less than $10,000.
